

WAGA Whitepaper

The "Value" Behind TryUnity

Published: [05/31/2025]

WAGA is a BEP20 token launched on the Binance Smart Chain representing the TryUnity Foundation. It is designed to serve as the foundational currency of the TryUnity Network. With a capped supply and a unique access mechanism through a digital passport, WAGA empowers decentralized participation and economic sovereignty.

Introduction

The TryUnity Foundation was established to foster decentralized systems of trust, value, and community empowerment.

WAGA is more than a token — it's the energy behind TryUnity. Through purposeful design, WAGA will transition from a Binance Smart Chain asset to the native token of the TryUnity Network.

Blockchain & Contract Details

Token Name

WAGA

Type

BEP20

Network

Binance Smart Chain (BSC)

Contract Address

0x9fdb93cc3b1309e11189998a4c833193958d1eb1

Tokenomics

Total Supply: 576,000,000,000 WAGA

Allocation Breakdown:

- **500,000,000,000 WAGA (86.8%)** — Available for harvest through the Digital Passport Embedding Protocol at passport.tryunity.life
- **76,000,000,000 WAGA (13.2%)** — Reserved for Founders, for use in airdrops, giveaways, and liquidity pools

Access Mechanism

WAGA is accessible exclusively through the Digital Passport system: [👉 passport.tryunity.life](https://passport.tryunity.life)

Users must engage with this embedding protocol to harvest their WAGA tokens. This system promotes active participation and ensures distribution to verified community members.

Use Cases & Vision

-  **Native currency of the TryUnity Network**
-  **Used for governance, staking, and community rewards**
-  **Enables cooperative economics and digital identity via smart wallets**
-  **Will evolve into a store of value and means of exchange within tribal and sovereign systems**

Roadmap

Phase 1

Launch on BSC

1

Phase 3

Onboarding Staking and Governance

3

Phase 2

Digital Passport Access Live

2

Phase 4

Begin TryUnity Network migration
